## AIM

I am a BackEnd developer with experience in building automation tools (RPA) and web applications, integrating cloud services in Azure Cloud Services. Throughout my career, I have demonstrated skills in designing and implementing effective solutions, focusing on fully meeting project requirements. Also willing to learn new technologies and use previous knowledge to acquire new results

## EXPERIENCE

- Software Engineer Intern | Qualidados | Salvador, BA, Brazil 10/2022 - 08/2024:
- Automation Tool Development:
  - Contributed to development and efficiency in the corporate environment by designing and implementing tools within the QRPA (Qualy Robotic Process Automation) web application using Flask and Microsoft Graph.
- API Implementation and Webhooks:
  - Integrated APIs and developed Webhooks to optimize workflows using Python and the Azure Graph API.
- Task Management:
  - Played a role in the automation tool development lifecycle, from identifying requirements and dependencies to software implementation and application deployment.
- Code Versioning on Microsoft TFS (Team Foundation Server):
  - Conducted code versioning on Microsoft TFS to ensure efficient control and collaboration in the development of automation tools.
- Cloud Services:
  - Utilized Azure cloud services, employing Virtual Machines (VMs) for application deployment. Additionally, I leveraged Azure cloud services, such as consuming Microsoft Graph, to build automation tools.
- My contributions to automation tool development resulted in significant improvements in operational efficiency and cost reduction for the organization I worked for.

## ACADEMIC

Undergraduate in Technology: University ESTÁCIO - Salvador-BA - 02/2022 - 11/2024  
Education: Systems Analysis and Development

## TECHNOLOGY

- Python - (Flask,Django,FastAPI)
- Angular - (TypeScript)
- Banco De Dados: MSSQL,POSTGRESQL
- C# (ASP.Net, Web-API)
- Git
- AZURE cloud Services

## LANGUAGE

ENGLISH - Advanced
